

## ICPerMed Working Group 4 - Education and Curricula for Personalised Medicine

### Our Focus

Mapping of the existing best practices in education and curricula implementation for personalised medicine and catalysing the development of new programs and activities in this area

### Our Aims

Identify and communicate best practices in the area

Develop recommendations on educational activities for PM

Identify potential new ideas/pilot projects to be implemented with ICPerMed endorsement

Organising trainings on Personalised communication of Personalised Medicine

Support ICPerMed and the other WGs on education and curricula related activities

### Our Activities

Mapping the existing initiatives in the field of implementation of new models for education and curricula for PM

Identify the barriers as well the enablers for education and curricula for PM implementation

Supporting documents in the perspective of EP PerMed

Contribution to the development of the Best Practice Examples Registry

Organisation and support for ICPerMed Family Meeting 2021
